PRESS RELEASE

TCL/PR/32/2627/Corporate

FOR IMMEDIATE RELEASE

Tata Chemicals Secures Three-Year Responsible Care® Logo Permission from ICC

Three-year permission reaffirms the company's commitment to safety, health and environmental stewardship

Mumbai, November 19, 2026: Tata Chemicals Limited has received permission from the Indian Chemical Council (ICC) to use the Responsible Care® logo for the period November 2026 to October 2029. This follows the successful recertification audit conducted at the company's Mithapur site in August 2026.

Responsible Care® is the global chemical industry's voluntary initiative to improve safety, health, environmental protection and community engagement. The successful audit at Mithapur reflects Tata Chemicals' continued adherence to these standards, as verified through an independent assessment.

As part of the permission, Tata Chemicals will cooperate with any surprise assessments by ICC and promptly report any major fire or accident. The logo represents an ongoing responsibility that must be upheld throughout the three-year term, rather than a one-time recognition.

Mithapur is one of Tata Chemicals' key operations, and the successful audit reinforces the company's focus on responsible operations, safety and environmental stewardship. It also underlines its accountability towards neighbouring communities, particularly those living closest to its operations, through safe practices, environmental care, transparent engagement and adherence to globally recognised standards.

Tata Chemicals will continue to implement the audit recommendations and maintain the standards required under the Responsible Care® initiative throughout the permission period.

About Tata Chemicals Ltd.
