Tata Chemicals to Invest ₹515 Crore in New IVSD Manufacturing Facility in Tamil Nadu

Chennai, 06th February 2026: Tata Chemicals Limited has announced an investment of ₹515 crore to set up a new greenfield manufacturing facility in Tamil Nadu as part of its capacity expansion and supply chain strengthening strategy. The new facility will be located at Valinokkam in the Ramanathapuram district of Tamil Nadu and will be used for the production of Iodised Vacuum Salt Dried (IVSD). The plant will have an installed capacity of 210 Kilo Tonnes Per Annum (KTPA). Tata Chemicals is expected to complete the project within 36 months and will fund the investment through internal accruals and or external financing.

Currently, Tata Chemicals has an IVSD manufacturing capacity of 1.6 million tonnes per annum at its Mithapur plant in Gujarat. The new greenfield facility in South India is intended to create a second major manufacturing site for IVSD, helping the company diversify its production base and improve regional supply capabilities.

The strategic rationale for the investment includes enhancing supply chain efficiency and optimizing logistics costs by bringing production closer to key southern markets. The new facility is expected to support better distribution, reduce transit time, and improve overall operational efficiency for the company's salt business.

This expansion reflects Tata Chemicals' continued focus on strengthening its core businesses and investing in long-term growth opportunities. The project is aligned with the company's strategy to build resilient manufacturing infrastructure, improve cost competitiveness, and support sustained demand across geographies. The investment also underscores Tata Chemicals' commitment to expanding its presence in South India and contributing to regional industrial development through large-scale manufacturing projects.

About Tata Chemicals Ltd.

A part of over US\$ 180 billion Tata Group, Tata Chemicals Limited, is a leading supplier of choice to Glass, Detergent, Industrial and Chemical sectors.
